

eurotec

DÉVELOPPEMENT

A GLOBAL SOLUTION FOR WATER MANAGEMENT

About Eurotec Développement

A family company since 1994

Multi-specialist skills in water management

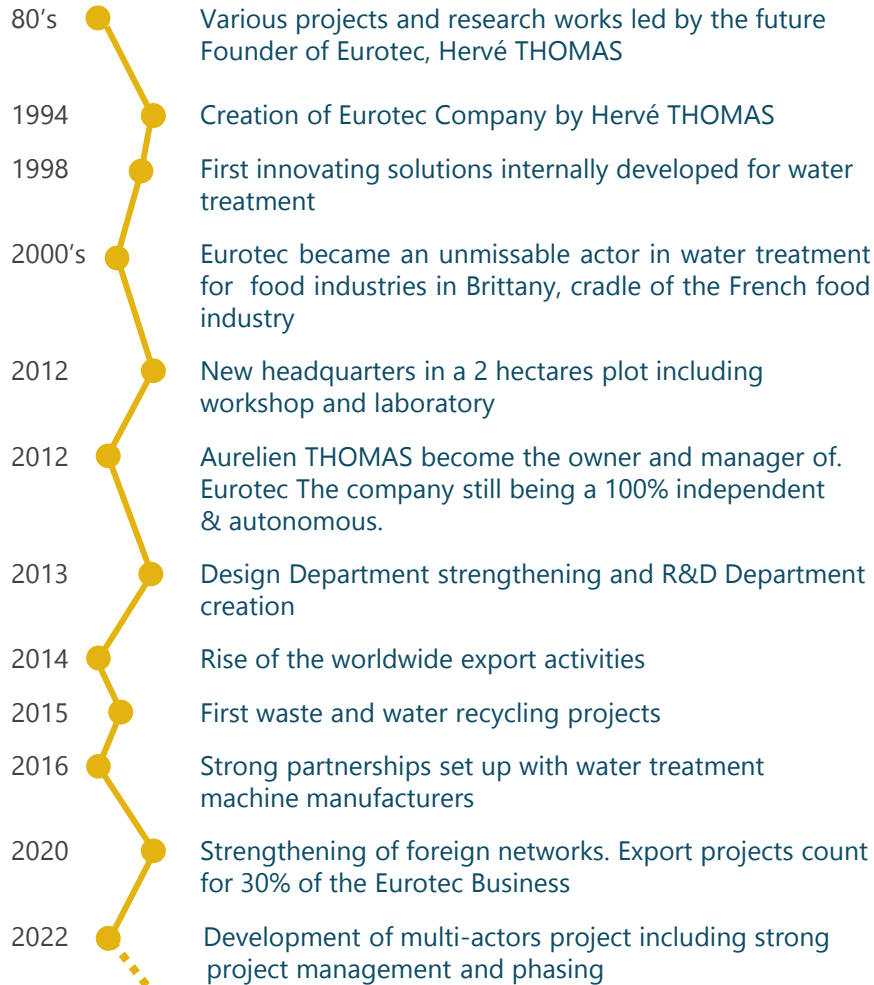

+500 achievements

30 collaborators with multidisciplinary skills

4 expertise departments

Eurotec through the years

Our philosophy

The company supports its customers in the West of France (30%), in the rest of France (40%) and abroad(30%)

Eurotec is an independent and technically and financially autonomous company, making it particularly agile and responsive for its customers

Thanks to our own **design office, manufacturing workshop** and project department, Eurotec carry out turnkey projects for new works but also for extension and rehabilitation

Eurotec technicians and engineers design and carry out turnkey projects requiring various skills from technical studies of biology or chemistry to the management of works including the resistance of materials or aeraulic

The company cultivates tailor-made products and customer partnerships by combining definition of specifications and commitment to results.

Asking the right questions at the right time, always in anticipation, is part of our DNA. Thanks to this, our services in water engineering but also in project coordination allow us to achieve the perfect achievement while being acclaimed by our customers and partners

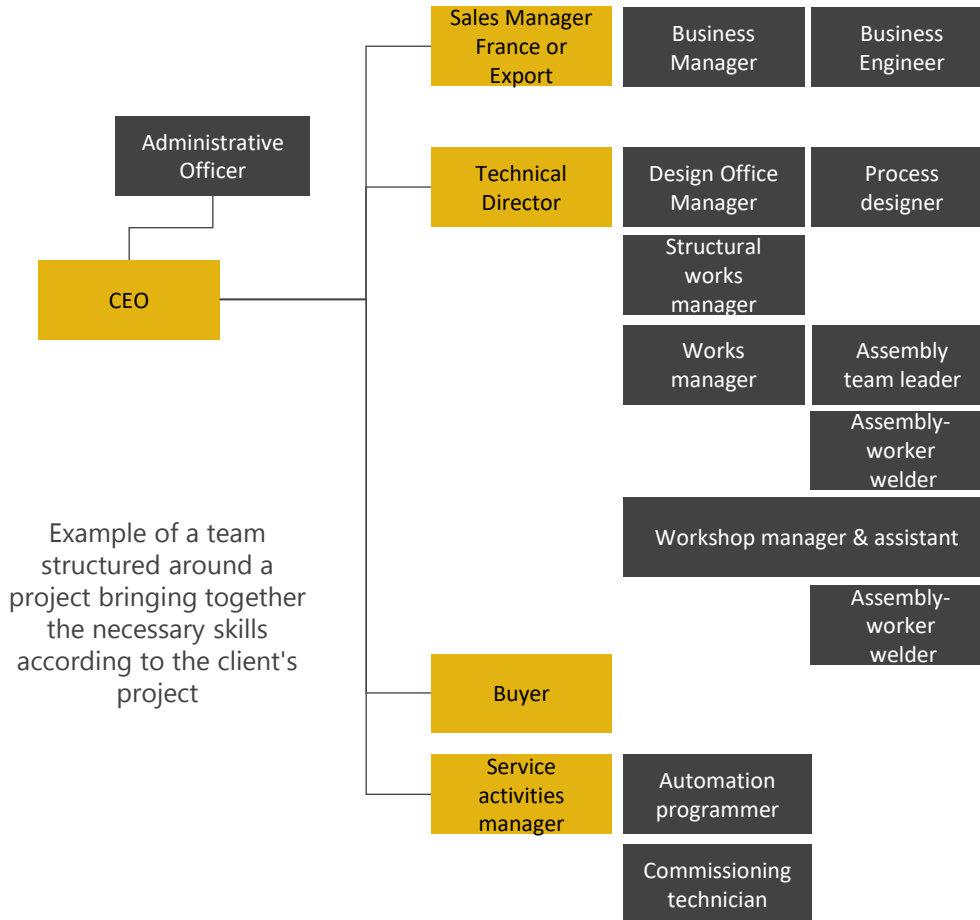

**Nowadays, providing integrated solutions is our goal.
Water saves and nearly zero discharges and intakes is our credo.**

Water recycling container

Ultrafiltration + Reverse Osmosis 20 m³/hour
Pilot test and rental container

A multidisciplinary project-oriented team

Dairy France
110.000.000 litres of milk /year

5000 m³/day – 28000 kg_{COD}/day
Picture: Biological treatment

Our centres of expertise

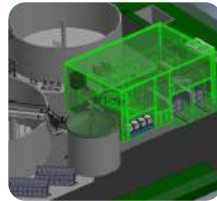

Project, Audit & Process expertise

- Facilities audit
- Treatment test
- Onsite pilot test
- Training

Works

- Supervision & monitoring of structural studies
- Site preparation
- Workshop assembly
- Site supervision
- Onsite assembly and commissioning

Design & Engineering

- Design and Guide plans
- Global or support to project management

Services

- After sales service
- Assistance or maintenance of your equipment
- Maintenance contract
- Technical assistance or operation
- Equipment rental

Rendering plant France
183.000 tonnes of processed waste/year

500 m³/day – 10000 kg_{CO₂}/day
Picture: Ultrafiltration unit

Technologies deployed

Mastered and deployed technologies allow Eurotec to bring solutions to a good water management and save, even in the heart of the production process for an optimum efficiency

As so, our customers can focus on their own occupation and trade knowing that water is recycled and re-used with no leakage, no losses. This accurate control is the key to water savings for a nearly zero water intake

Cheese plant France
3.000.000 litres of milk/year
300 m³/day – 900 kg_{CO₂}/day
Picture: Sludge storage before dewatering

Multi-specialist in the water cycle

Areas of expertise

- Drinking water
- Process water
- Industrial wastewater
- Sludge treatment
- By-product treatment
- Air treatment
- Water recycling and re-use
- Automation and industrial computing

Sector of intervention

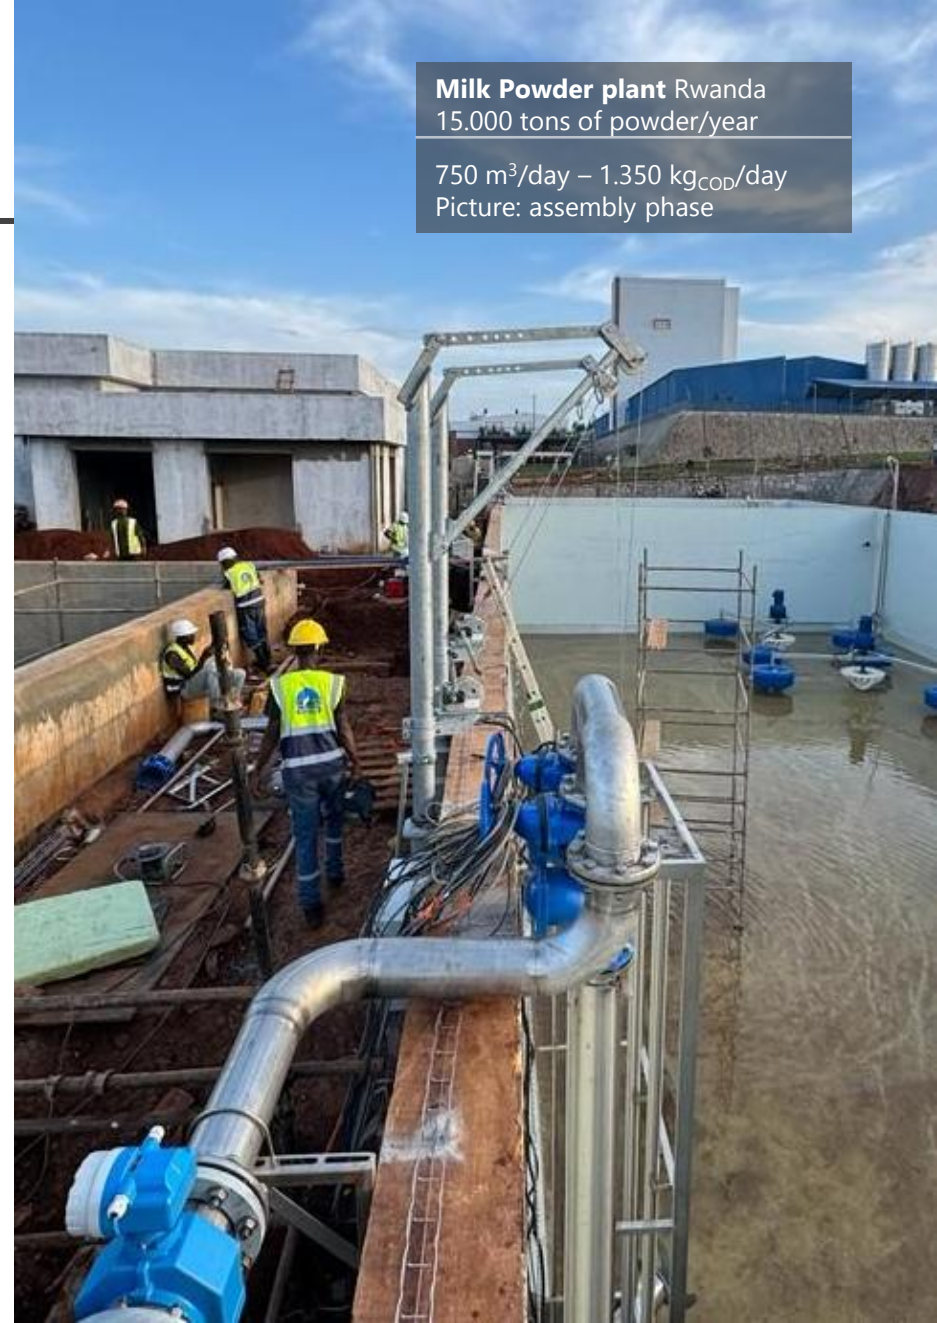

- Breeding & Aquaculture
- Food industry
- Processing industry
- Tannery
- Paper mill
- Laundry
- Chemical & Pharmaceutic industries
- Base camp

Skills and offered support

- Case by case studies
- Engineering
- Own requirements for equipment and service quality
- Attentive relationships
- Project management
- Offer diversity : turnkey project in new works, rehabilitation, extension
- Phased solutions and continuity of service

Milk Powder plant Rwanda
15.000 tons of powder/year

750 m³/day – 1.350 kg_{CO₂}/day
Picture: assembly phase

Culture of the customised solutions

Modular designs

Indoor solutions

Ready-to-plug skids

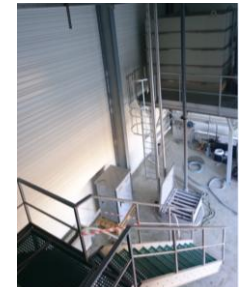

Underground solutions

Conventional solutions

Confined space solutions

Food processing plant France
500.000 tons (intake)/year

2000 m³/day – 1100 kg_{COD}/day
Picture: assembly phase

Human beings, a key to project success

Some references

They trust us

As a result of attentive relationship and a parallel ramp-up of our respective skills, the yesterday customers still being our current and future customers. In add 95% of our services contracts are renewed years after years

Our customers continue to call on Eurotec services and solutions for their water challenges and new work projects

As part of them :

GROUPE LDC – European leader in poultry business

GROUPE BIGARD – European leader in red meet business

GROUPE REMONDIS – European leader in organic waste rendering

GROUPE SAVENCIA – European leader in milk business

GROUPE ITM – All kind of integrated food processing plants

GROUPE DOUX / GROUPE ALMUNAJEM – Brand Père Dodu

GROUPE BEL – Brand La Vache qui rit

GROUPE YVES ROCHER, L'OREAL - international cosmetic companies

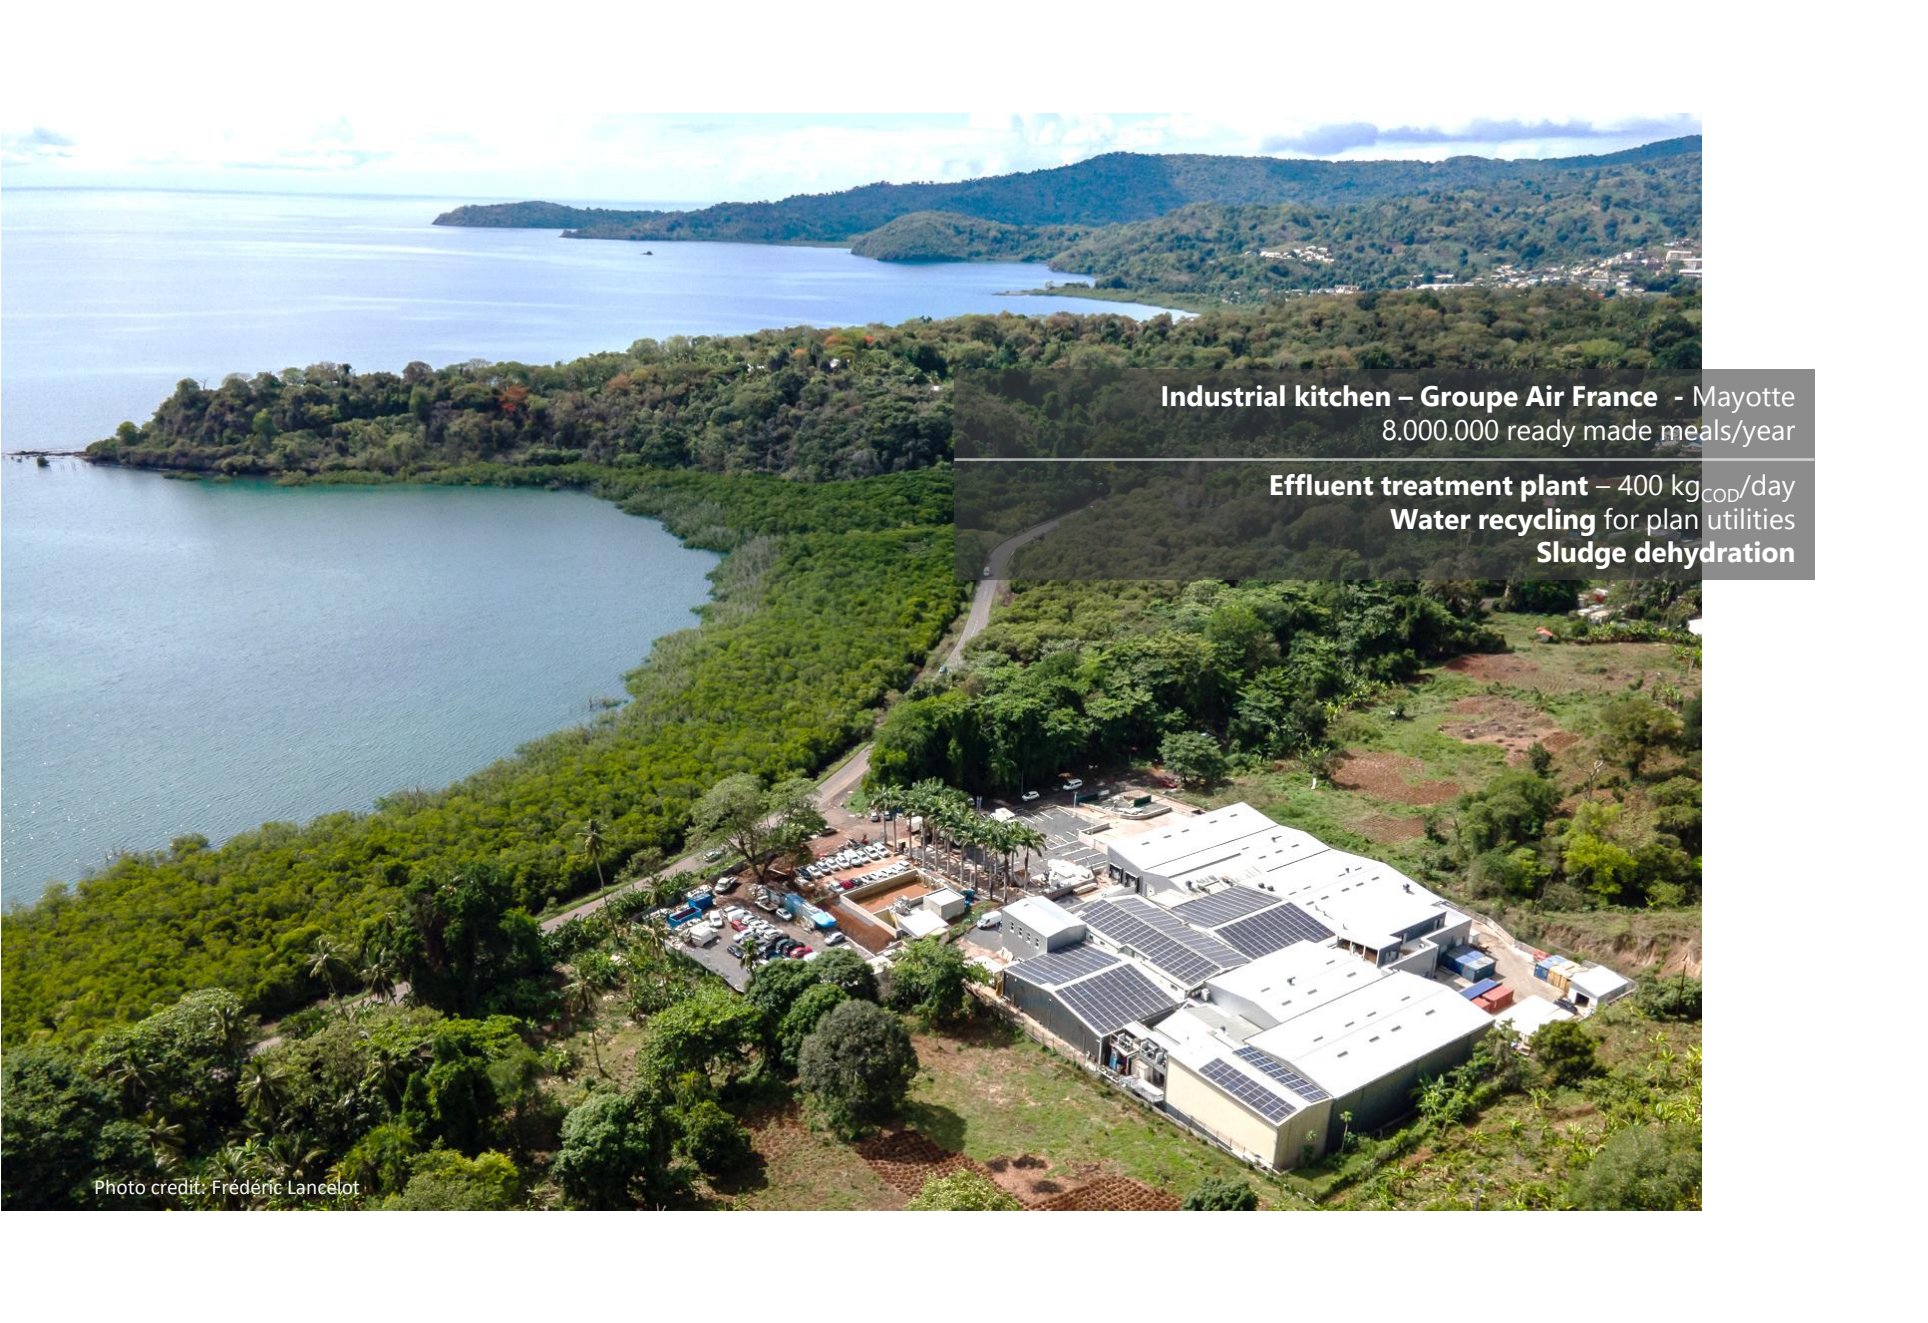

Milk powder plant Rwanda
16.000 tons of powder/year + 50.000 tons of butter/year

Effluent treatment plant – 750 m³/day – 1350 kg_{COD}/day
Water recycling – up to 60%
Sludge dehydration – agricultural reuse

Meat processing plant France
40.000 ton (intakes)/year

By-product management
Food waste separation for pet-food,
rendering valorisation and water saves
and recycling

Industrial kitchen – Groupe Air France - Mayotte
8.000.000 ready made meals/year

Effluent treatment plant – 400 kg_{COD}/day
Water recycling for plant utilities
Sludge dehydration

Cement plant Algeria
1.600.000 tons of clinker/year

Base camp wastewater treatment plant
750 people equivalent

Industrial Kitchen
France

Effluent pretreatment plant
550 kg_{COD}/day

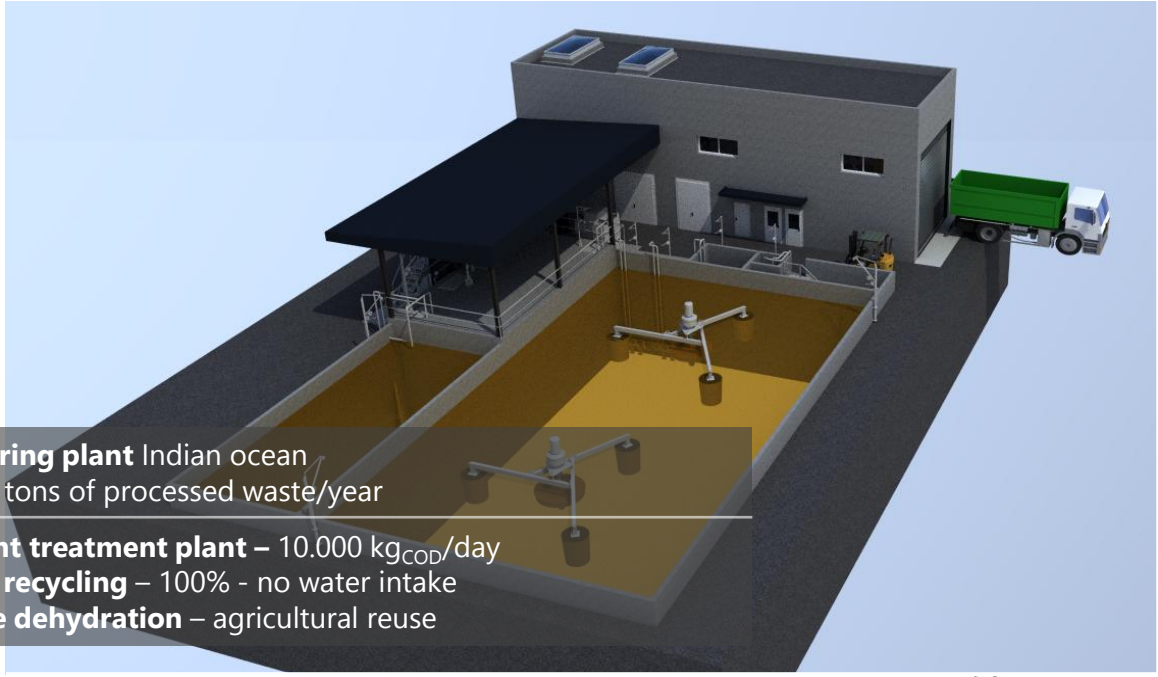

Poultry slaughterhouse France
350.000 poultry/week

Effluent treatment plant - 2000 kg_{CO₂}/day
Water recycling – up to 60%
Sludge dehydration – agricultural reuse

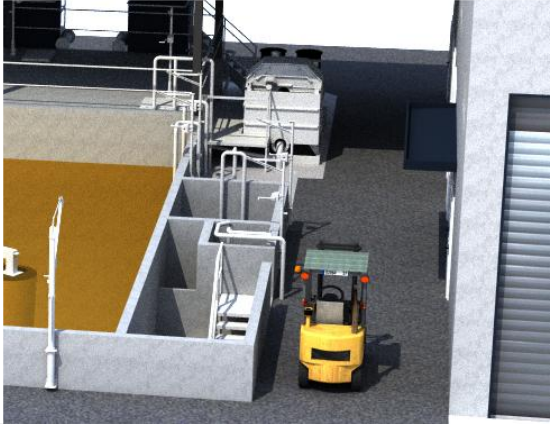

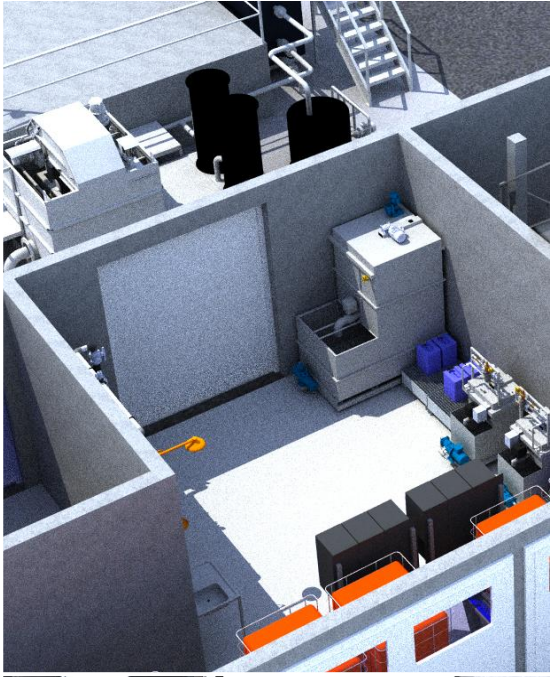

Diary and cheese production plant France
3.000.000 litres of milk / year

Effluent treatment plant – 2.000 kg_{COD}/day
Water recycling – up to 60%
Sludge dehydration – agricultural reuse

Rendering plant Indian ocean
20.000 tons of processed waste/year

Effluent treatment plant – 10.000 kg_{COD}/day
Water recycling – 100% - no water intake
Sludge dehydration – agricultural reuse

Meat processing plant
France

Effluent treatment plant - 2000 kg_{COD}/day
Water recycling – 20% - no water intake
Sludge dehydration – agricultural reuse

Food processing plant France
100.000 tons/year

Effluent pretreatment plant
300 m³/day - 900 kg_{CO₂}/day

Poultry slaughterhouse France
110.000 poultry/week

Extension of an effluent treatment plant - +600 kg_{CO₂}/day
Water recycling – 10%
Sludge dehydration to anaerobic digestion

Dairy France

110.000.000 litres of milk/year

Effluent treatment plant – 5000 m³/day - 28.000 kg_{COD}/day

Water recycling – 25%

Sludge dehydration – agricultural reuse

Non-food industry France

Water recycling – 240m³/day

Pilot test before industrial scale treatment

All-in-One : Chemical treatment, microfiltration, overpressure
